STANDARD STRETCH FOIL FOR HAND PACKING

Standard foil for manual wrapping of both pallets and smaller packages.

Our offer includes foils with a thickness of 17 to 23 mm microns, weighing 2 kg; 2.5kg; 3kg gross on 0.3kg thimbles

Transparent foils are standard in our offer. We also verify the availability of foil in various colors upon customer request.

Products – Machine

STANDARD

Standard machine stretch film , with stretch from 100 to 180% (depending on the film thickness), intended for wrapping using packaging machines, with a maximum rotation of up to 12 revolutions per minute

POWER

Machine-made, universal stretch film , designed for wrapping machines with a pre-tension of up to 200 - 280% and a rotation frequency of 30 revolutions per minute.

SUPER POWER

Technologically advanced stretch film , intended for wrapping machines, with pre-tension up to 240 - 350% and rotation frequency 72 revolutions per minute.

Advantages of using Power and Super Power machine foil compared to Standard foil this:

- optimization of packaging costs per pallet unit (approx. 10 - 15%);
- stability and repeatability of the packaging process;
- reducing the amount of waste;
- saving time and space (larger number of pallets wrapped using one roll).

Products – Bubble wrap

Advantages of bubble wrap:

- provides excellent cushioning,
- protects against water, moisture, pollution and temperature changes,
- ideal for securing furniture, glass, ceramics, electronic equipment and many other objects,
- perfect for filling empty spaces in collective packaging,
- recyclable.

Our offer includes foils of various weights and a maximum width of up to 150 cm. We adjust the length of the foil to the customer's needs. Contact us to choose a foil that will meet your needs.

Products – Solid cardboard angles

Solid cardboard angles:

- they are used to protect goods against damage both during transport and storage;
- thanks to their hard structure, they are resistant to impacts, shocks and other mechanical damage;
- improve the stability of goods;
- protect against damage to goods caused by fastening tapes and stretch foils etc ;
- they are characterized by increased resistance to moisture, they can be used in unfavorable weather conditions - even in frost!;
- they do not transmit light, protecting the protected goods from fading;
- they are environmentally friendly and can be recycled.

Choose an angle that suits your needs - we have isosceles, unequal, bent, cut angles with increased moisture resistance and with any print. .

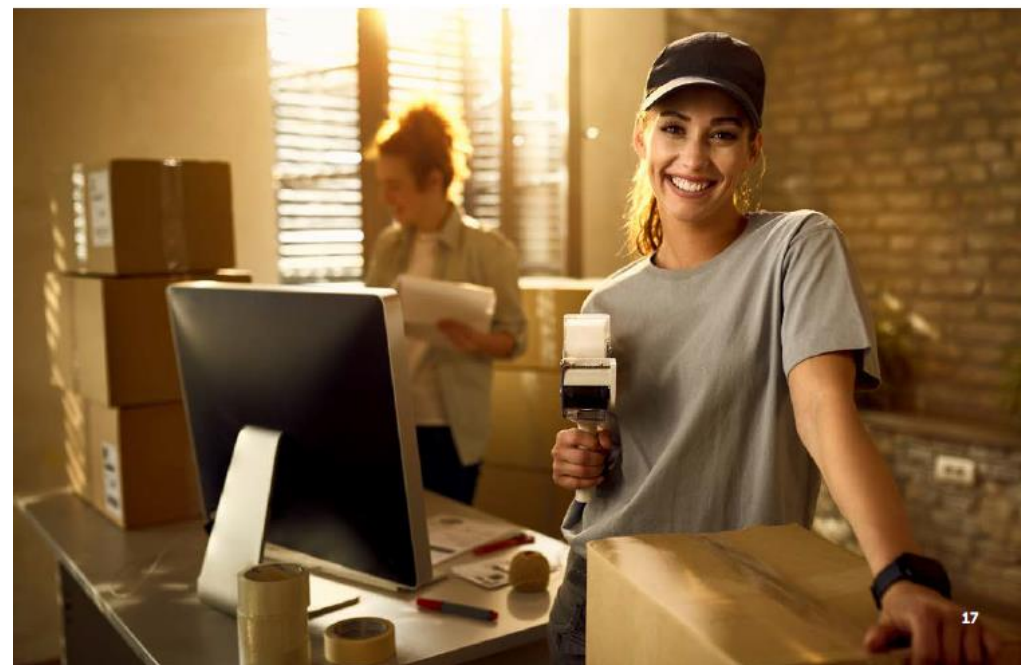

Products – Self-adhesive packing tapes

Acrylic tapes

ACRYLIC GLUE TAPES guarantee

- stable technical properties ,
- high quality at the best price ,
- compliance with all EU regulations.

Contact us, our advisors will help you choose the tape that suits your needs!

 BOPP film (in microns)
 Krill glue (in microns)

Products – Self-adhesive packing tapes

QUIET REWINDING TAPES, SO-CALLED LOW NOISE

Silent unwinding tapes, the so-called **LOW NOISE** , allow for quiet operation during application. Perfect for use in large production halls or for any entrepreneur who values the comfort of work, both for themselves and their employees. This tape can be applied to various types of paper and cardboard packaging, including recycled ones. Suitable for applications in a wide temperature range, also in cold and wet environments . Perfect for light and medium-heavy boxes.

TAPES WITH HOT-MELT GLUE

A range of tapes using synthetic rubber adhesive , known for **quickly bonding to the surface** . This solvent-free tape is a good solution where high adhesion and good stability in a wide temperature range are required.

Products – Self-adhesive packing tapes

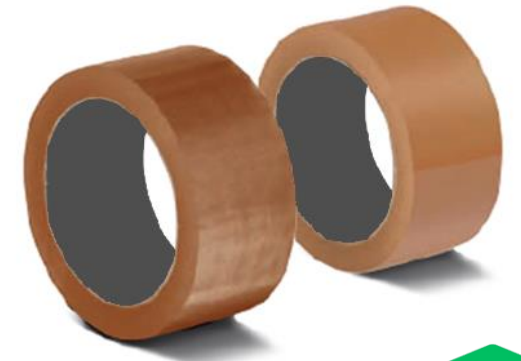

SOLVENT GLUE TAPE

This tape is dedicated to the most demanding applications . The adhesive based on natural rubber enables **the tape to bind strongly** to the surface immediately after application, and also guarantees its durability in the widest temperature range.

TAPES WITH BIO-SOLVENT ADHESIVE

eco-solvent glue , it is characterized by excellent adhesive properties , which increase over time. It is resistant to UV radiation and low temperatures. This tape is available in machine and manual versions.

*Products available in various widths and lengths.

Products – Self-adhesive packing tapes

PAPER TAPE

High-quality, ecological paper tape, recyclable even when applied to cardboard packaging, without the need to tear it off the surface.

- adhesive based on natural rubber - permanent connection with the glued surface, also for demanding cardboard packaging,
- easy to dismantle with your hand - no need to cut the tape,
- high initial adhesion to cardboard packaging - permanent connection with the surface immediately after gluing,
- adhesion strength to steel: 6 ± 1 [N/25mm],
- application at temperatures above 15 degrees Celsius, storage of sealed boxes at temperatures from -20 to +40 degrees Celsius.
- Dimension: width 50mm, length 50m.

Coming soon: pallet corners and paper dividers for pallets.

Products – Dispensers

PACKING TAPE DISPENSER

- Universal tool for manual application of self-adhesive tape.
- Necessary equipment for anyone who would like to quickly and safely seal collective packaging with packing tape.
- A comfortable handle, blade cover, and the best quality materials make it an ergonomic tool that facilitates everyday work on a production line or warehouse.

WORK GLOVES, PVC SPOTCHED

Dot-shaped protrusions improve grip and additionally protect your hands. Thanks to the cuff, the gloves adjust to the wrist. Available in three colors:

- black and gray (cotton gloves),
- white (nylon gloves).

Products – Specialized tapes

Masking tapes

Masking tapes have been developed to protect various surfaces from dirt while painting. They allow you to achieve straight lines, easily adapt to uneven surfaces, and, after finishing work, tear them off without leaving any traces of glue.

Repair tapes

Repair tapes (duct tapes) - this is irreplaceable "first aid" in many ways emergency situations, which allows you to repair damage with little work. It is a perfect and timeless solution for quick and reliable repairs - both at home and in industry.

Double-sided tapes

Double-sided adhesive tapes, thanks to their universal structure, are used in many different industries. They are valued by craftsmen and are also necessary for ordinary consumers. This is an ideal solution that allows for a strong and quick connection of two elements.

Products – Strapping tapes

Strapping tapes are specialized products intended for both manual and machine strapping and strapping of various types of loads. Extremely strong and durable, they are suitable for securing both pallets and smaller packages.

The LARMONT assortment includes two types of strapping tapes:

- Polypropylene strapping tape (PP),
- Polyester strapping tape (PET).

Products – Strapping tapes

POLYPROPYLENE STRAPPING TAPE (PP)

Polypropylene strapping tape is used to strap and stabilize transported goods. The tapes are easy to use and provide low strapping costs per load unit.

The main applications of PP polypropylene tapes are:

- strapping and securing cartons,
- fastening wooden elements,
- stabilizing products on cargo pallets.

POLYESTER STRAPPING TAPE (PET)

Polyester tapes are used for strapping and storing heavy pallets, difficult shipments and undersized loads.

PET strapping tapes:

- are characterized by high tensile strength,
- withstand high and low temperatures,
- they are not sensitive to ultraviolet radiation
- are resistant to weather conditions
